

Whitemore Ngwira

Systems Architect | Full-Stack & AI Workflow Architect | Creative Technologist

Public recruiter evidence pack for systems architecture, product delivery, AI workflow, and creative technology review.

Fast Evidence Route

Portfolio website:	nwhite.systems
GitHub showcase:	github.com/whitemorengwira/nwhitesystems
Recruiter guide:	nwhitesystems/docs/recruiter-review-guide.md
Architecture proof:	systems architecture proof log
Public source proof:	github.com/whitemorengwira/safa-promax
Walkthrough request:	hello@nwhite.systems

Best Public Evidence By Role

- Systems architecture: showcase, architecture notes, proof log, and controlled-disclosure case studies.
- Full-stack delivery: SAFA ProMax public Next.js/TypeScript source, build/audit proof, and README.
- Regulated workflow: EarCodeX, SAM Dossier, mining, insurance, and enterprise case studies.
- Digital transformation: public sites, visual context, live artifacts, presentations, and workflow mapping.

Public Verification Signals

- Verified June 5, 2026 across six public showcase repositories.
- GitHub Free hygiene: community files, no OSS license grant, disabled noisy tabs, releases, light protection.
- Security posture: Dependabot updates, secret scanning, push protection, and private vulnerability reporting.
- SAFA ProMax passed lint, typecheck, production build, and production-dependency audit checks.
- Social preview images are live across all six repos; profile pins follow the recruiter review path.
- Generated visuals and demo media are labeled and avoid confidential data, credentials, and private dashboards.

Monthly Systems Architecture Proof

The proof log records problem, decision, tradeoff, verification, and public link. The June 2026 entry documents the GitHub cleanup, SAFA verification, social previews, branch/security posture, and controlled-disclosure review path.

Selected Public Repositories

- [nwhitesystems](#): Portfolio index, recruiter guide, proof log, case studies, demo media, and proof signals.
- [safa-promax](#): Public source proof for creative technology and protected presentation workflow.
- [earcodex-case-study](#): Sanitized SaaS and regulated workflow product case study.
- [socinga-africa-enterprise-case-study](#): Enterprise website and stakeholder communication case study.
- [sam-dossier-case-study](#): Controlled-access dossier and stakeholder dashboard case study.

Confidentiality And Contact

- Public materials are sanitized; credentials, records, dashboards, and confidential workflows are excluded.
- Deeper walkthroughs are available where permission and confidentiality allow: hello@nwhite.systems
