

Whitemore Ngwira

Systems Architect | Full-Stack & AI Workflow Architect | Creative Technologist

Public recruiter evidence pack for hiring teams reviewing systems architecture, product delivery, AI workflow, and creative technology work.

Fast Evidence Route

Portfolio website: nwhite.systems

GitHub showcase: github.com/whitemorengwira/nwhitesystems

Recruiter review guide: nwhitesystems/docs/recruiter-review-guide.md

Public source proof: github.com/whitemorengwira/safa-promax

Walkthrough request: hello@nwhite.systems

Best Public Evidence By Role

- Systems architecture: NWhite Systems showcase, architecture notes, and controlled-disclosure case studies.
- Full-stack/product delivery: SAFA ProMax public Next.js/TypeScript source, build/audit proof, and curated README.
- Regulated workflow thinking: EarCodeX, SAM Dossier, mining, insurance, and enterprise stakeholder case studies.
- Creative technology and digital transformation: public sites, generated visual context, live artifacts, and presentation systems.

Public Verification Signals

- Verified June 5, 2026 across six public showcase repositories.
- GitHub Free hygiene active: community files, copyright/usage boundaries, no OSS license grant, disabled noisy tabs, release tags, and light branch protection.
- Security posture active: Dependabot security updates, secret scanning, push protection, and private vulnerability reporting on the public showcase repos.
- SAFA ProMax passed lint, typecheck, production build, and npm audit checks; public Dependabot alerts were verified clear.
- Generated visuals and demo media are labeled as public portfolio media and do not expose private dashboards, records, credentials, or confidential workflows.

Selected Public Repositories

- nwhitesystems: Portfolio index, recruiter guide, case studies, demo media, and proof signals.
- safa-promax: Public source proof for board-facing creative technology and protected presentation workflow.
- earcodex-case-study: Sanitized SaaS and regulated workflow product case study.
- socinga-africa-enterprise-case-study: Enterprise website and stakeholder communication case study.
- sam-dossier-case-study: Controlled-access dossier and stakeholder dashboard case study.

Confidentiality And Contact

- Public materials are intentionally sanitized. Credentials, private dashboards, student records, investor records, commercial records, and confidential operational workflows are excluded from public review.
- Deeper walkthroughs are available where permission and confidentiality allow: hello@nwhite.systems
